

11. Playfair Cipher Key Space

The image shows a code editor window with a file named `main.c`. The code is a C program that prints information about the Playfair cipher key space. The code is as follows:

```
1 #include <stdio.h>
2
3 int main()
4 {
5     printf("Playfair Cipher Key Space Analysis\n\n");
6
7     printf("Total Possible Keys (Ignoring Duplicates)\n");
8     printf("25! ≈ 2^84\n\n");
9
10    printf("Effectively Unique Keys\n");
11    printf("Approximately 2^83\n");
12
13    return 0;
14 }
```

Next to the code editor is a `Run` button. To the right of the code editor is an `Output` window. The output of the program is as follows:

```
Playfair Cipher Key Space Analysis

Total Possible Keys (Ignoring Duplicates)
25! ≈ 2^84

Effectively Unique Keys
Approximately 2^83

=== Code Execution Successful ===
