

13. Known Plaintext Attack on Hill Cipher

The image shows a code editor window with a file named 'main.c' and an adjacent 'Output' pane. The code in 'main.c' is a C program that prints the title 'Known Plaintext Attack on Hill Cipher', the known plaintext 'HELP' and ciphertext 'ZEBB', and a recovered key matrix. The output pane displays the same text as the code, followed by '=== Code Execution Successful ==='. The code is as follows:

```
1 #include <stdio.h>
2
3 int main()
4 {
5     printf("Known Plaintext Attack on Hill Cipher\n\n");
6
7     printf("Known Plaintext : HELP\n");
8     printf("Known Ciphertext : ZEBB\n\n");
9
10    printf("Recovered Key Matrix\n");
11    printf("9 4\n");
12    printf("5 7\n");
13
14    return 0;
15 }
```

The output pane shows the following text:

```
Known Plaintext Attack on Hill Cipher
Known Plaintext : HELP
Known Ciphertext : ZEBB

Recovered Key Matrix
9 4
5 7

=== Code Execution Successful ===
```
