

18. DES Subkey Generation

The image shows a code editor window with a file named 'main.c'. The code is a C program that prints out the steps of DES Subkey Generation. The code is as follows:

```
1 #include <stdio.h>
2
3 int main()
4 {
5     printf("DES Subkey Generation\n\n");
6
7     printf("First 24 bits -> Left 28-bit half\n");
8     printf("Second 24 bits -> Right 28-bit half\n");
9
10    printf("\nSubkeys Generated Successfully.\n");
11
12    return 0;
13 }
```

The output of the program is displayed on the right side of the editor:

```
DES Subkey Generation

First 24 bits -> Left 28-bit half
Second 24 bits -> Right 28-bit half

Subkeys Generated Successfully.

=== Code Execution Successful ===
```
