

Input

```
e = 17
n = 3233

m = int(input("Enter plaintext number: "))

cipher = pow(m, e, n)
print("Ciphertext =", cipher)

print("\nBrute Force Attack:")

for i in range(26):
    if pow(i, e, n) == cipher:
        print("Recovered plaintext =", i)
        print("Character =", chr(i + 65))
        break
```

Output

```
Enter plaintext number: 7
Ciphertext = 2369

Brute Force Attack:
Recovered plaintext = 7
Character = H
```
